Emotional Footprint

SoftwareReviews collects user insights that help organizations more effectively choose software that meets their needs, measure business value, and improve selection.

The Emotional Footprint award evaluates and ranks software products based on emotional response ratings from business and IT professionals. The award captures user sentiment across key dimensions of the vendor-client relationship and product effectiveness.

Rankings, results, and positioning on SoftwareReviews reports are based entirely on end-user feedback solicited by a proprietary online survey engine.

Transparent

Built on Trust

Clarity and honesty are built into every interaction, from onboarding to ongoing collaboration.

96%

of customers say Progress saved them time.
